THE DIAMOND WIRE

SEPTEMBER
2017

EXPERIENCE AND INNOVATION.

Q-TEQ is the first company to have introduced into the market a diamond wire of 4,3 mm diameter for cutting of both granite and marble with multi-diamond wire cutting machines.

The product has been developed thanks to the long, multi-years experience of **Michele Bidese**, in cooperation with a staff of an highly specialized professional team.

Q-TEQ is a sound company oriented to the future. For this reason it has recently started an ambitious project to realize its own research laboratory equipped with the most advanced and sophisticated analysis instruments and equipments completely dedicated to research and development.

A specialized staff is full time focused to the research and continuous improvement of the diamond wire performances in cooperation with one of the most famous scientific Polish University where are executed very specific analysis and laboratory tests.

PRODUCTS.

The diamond wire is completely produced at the **Q-TEQ** factories with modern processing lines specially customized to satisfy the highest quality standards.

Q-TEQ is today able to successfully compete with the most famous diamond wires producers, both in terms of quality and price.
